Professional Profile

Highly motivated and detail-oriented recent graduate seeking an entry-level position in **Software Engineering Field**. Eager to bring a strong foundation in **[Artificial Intelligence & Machine Learning]** and a passion for learning to a dynamic team. Dedicated to applying academic knowledge to real-world challenges and contributing to organizational goals with strong analytical and communication skills.

Education

Shri RamSwaroop Memorial University [2025 –2029]

[Barabanki ,Lucknow ,UP]

- **COURSE- Btech Cse{AI&ML}**
- **CGPA:** [7.52]
- **Honors & Awards:** Awarded for a Project name Remote controller using Software
- **Key Focus:** Artificial Intelligence and Machine Learning

Academic & Personal Projects

[AI-Powered Real-Time Shape Detection & Mission Telemetry],

Sept,2026

[Smart India Hackathon Prototype]

- Designed and developed an end-to-end computer vision and monitoring prototype for automated shape classification (Triangle, Rectangle) and live (X, Y) coordinate tracking using Python, OpenCV, and YOLOv8.
- Integrated strict Non-Maximum Suppression (iou=0.4) to eliminate duplicate bounding boxes and engineered a real-time Streamlit web dashboard with interactive camera controls and live video rendering.
- Implemented automated background CSV logging (shape_log.csv) for real-time telemetry analysis, creating a robust, competition-ready prototype for the Smart India Hackathon.
